M E R I N O S T U D

FINE WOOL GENETICS RAM SALE

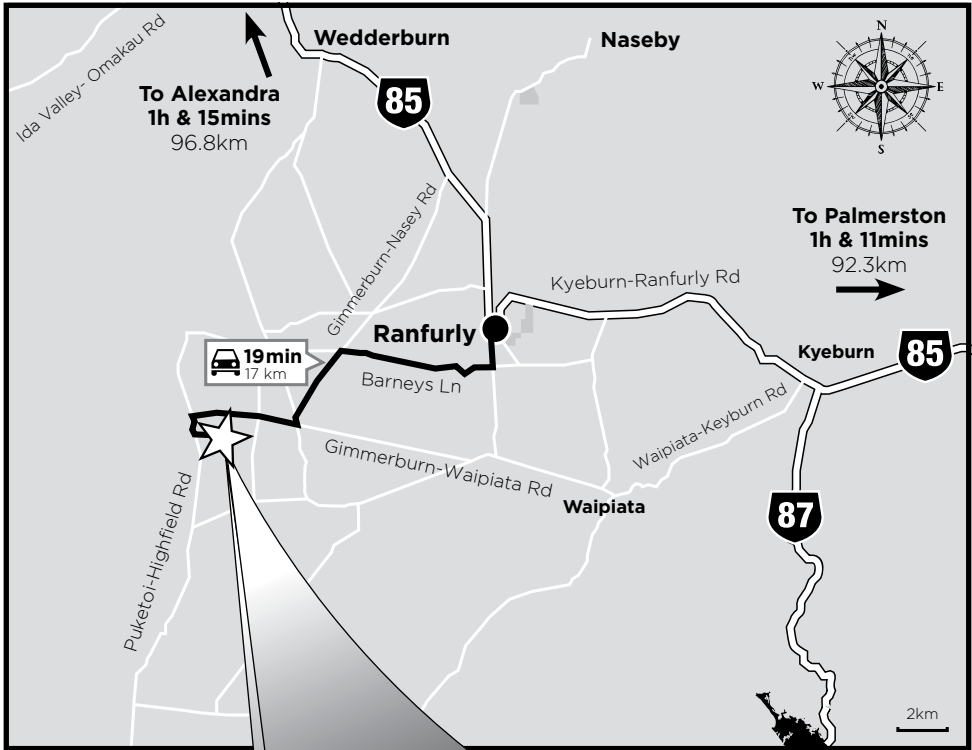

Friday 24 January 2020  
Inspection from 11am  
Sale commences 1:30pm

## Featuring

30 Merino & Poll Merino Rams	17 - 20 micron
45 Quarterbreds .....	18.5 - 23 micron
45 Halfbreds .....	20 - 24.5 micron

# Map

# Foreword

---

The team here at Armidale welcome everyone to our second on property ram sale. Thank you to everyone who supported last year's sale. We trust that all our rams performed to expectations.

As always, our focus is on real commercial performance. Our stud stock must perform in large mobs and are put under to worm pressure and feed pressure at various times during their lifetime. Rams go through rigorous structural assessment and are culled for lack of wool quality and constitution. A massive amount of raw data is collected on every animal (more than any breeding operation outside the CPT). Selecting on growth, wool quality and quantity as well as animal health traits ensures that we have industry leading economic farm surplus per stock unit.

We have selected 30 elite Merinos for this year's auction. Outside of our reserves, these are the top of the drop, combining performance with phenotype. There is a range of types with rams to suit everyone. Included in this year's sale are some Anderson 474 sons that are trait leaders for reducing worm egg counts, increasing eye muscle depth and early growth.

The Quarterbreds give a great option for fining up existing mid micron sheep to target specific wool contracts. Very little is sacrificed in terms of number of lambs weaned and growth from a crossbred sheep. With adult ewes' sub 24 micron there are significant wool returns to be made.

The Halfbreds combine the fertility and growth of a crossbred with a much more substantial wool cheque. With hogget wool under 24 microns and a substantial carcass there are plenty of options for finishing lambs. Armidale's five-year weaning percentage from our Halfbreds is over 160%.

Feel free to contact us with any queries. We look forward to seeing you on sale day.

**Simon, Sarah, Hugo & Bede  
Allan & Eris**

# Conditions of Sale

1. This sale will be conducted under the New Zealand Stock and Station Agents Association Conditions for Sale. When proceeds are credited or a purchase is debited to a PGW account the companies terms and conditions apply to the extent deemed relevant. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGWS terms and conditions are available on their website.  
**[www.pggwrightsons.co.nz/Our-Company/Terms-and-Conditions](http://www.pggwrightsons.co.nz/Our-Company/Terms-and-Conditions)**
2. Each lot shall become the property of the purchaser at the fall of the hammer.
3. Finance terms are strictly cash prior to delivery unless credit arrangements have been made with the auctioneer prior to the sale.
4. The entry of rams in this catalogue constitutes a guarantee of fertility. Any disputes shall be settled by an Arbitrator appointed by the auctioneer.
5. Although all care has been taken to ensure the accuracy of the information contained in this catalogue, no responsibility is accepted for any error or omission.
6. The sale will be conducted exclusive of GST.
7. A 6% rebate commission will be paid to outside companies introducing buyers to the sale.
8. **Transport**- Leave full and explicit instructions in regard to transport
9. **Insurance**- The selling agents can arrange insurance on any stock.
10. Upset price : Quarterbreds and Halfbreds \$600.00 at auction, any passed rams \$800.00
11. Upset price: Merinos \$900 no passed rams available after auction.

## OVERSEAS EXPORT

12. **Prior to auction**- Purchasers who wish to export the animal/s (“Export Purchasers”) must advise the auctioneers at least 2 hours prior to the sale commencing that they are considering purchasing specific breeds at the auction. The Auctioneers will then advise the vendors.
13. Purchase at auction by Export Purchasers is conditional upon the animal’s purchased passing all relevant export protocol and testing (conducted at the Export Purchaser’s expense). Full payment (plus GST) will be made at the fall of the hammer to the Auctioneers as per usual terms and conditions. Payment will be held by the auctioneers until the animal/s leave New Zealand. Payment will be refunded to the Export Purchasers less all associated export costs for any animal/s purchased failing export protocol and testing.

## ALL RAMS ARE VET TESTED AND ACCREDITED BRUCELLOSIS FREE

**Health and Safety** - Every effort will be taken by the vendors, PGG Wrightson, their staff and assistants, both on the sale day as well as any visits of inspection to ensure the safety of intending buyers and visitors. We wish however to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety.

# Performance Recording

Ram Hoggets get Measured for Weaning Weight, 200 Day Weight and a Yearling Weight, Dag Score, Carcass Traits, Individual Worm Egg Counts, Staple Length, Greasy Fleece Weight and Wool tests for Micron, CV, SD and Comfort Factor. Wool weights don't include bellies and crutching's. We haven't catalogued all this information but ASBV's for all traits can be looked up on the Merino Select website. Our Stud number is 740167 and the 6-digit tag number is the Animal ID.

## Armidale drop Averages for Performance Data Actuals:

	Date Measured	Merino Average	Halfbred Average	Quarterbred Average
200 Day Weight	20th May	52 kg	61 kg	61 kg
200 Day EMA	20th May	13 cm <sup>3</sup>	18 cm <sup>3</sup>	18 cm <sup>3</sup>
300 Day Wt	20th August	61 kg	65 kg	65 kg
Hog Micron	1st August	17 $\mu$	23 $\mu$	20.8 $\mu$
GFW	10th September	4.4 kg	4 kg	4.5 kg

## Animal Health:

All Rams have had a 10 in 1 vaccination in Jan and Feb and have been given another booster in December. They have had Clik applied to horns and rump on the 27th of November and will be given a quarantine drench upon leaving the property. All rams have been vet inspected in early December and the property is accredited Brucellosis free. We drench minimally based on mob faecal egg counts and ram hoggets are put under significant worm egg count pressure in the Autumn prior to doing individual counts. We measure our carcass traits at the same time identifying those that still perform under a challenge.

For annual ram care we recommend:

- Annual clostridial vaccination
- Palpation of rams at least four weeks before joining
- Check feet and trim if required at least four weeks prior to joining.
- Drench prior to joining
- Maintain a good condition score throughout year.

# Understanding MERINOSELECT ASBV's

At Armidale we have been generating Merinoselect ASBV's for the last 5 years and used correctly they can aid in the selection of your ram purchases. Although we do our best to accurately collect and record data there will always be potential for rams to breed differently to stated figures. Visual assessment is still extremely important in ram selection. We have ASBV's for our Quarterbreds, Halfbreds as well as our Merinos.

## WHAT ARE ASBVS?

ASBVs are the units of measurement MERINOSELECT use to analyse animals.

### Australian Sheep Breeding

Values are an estimate of an animal's breeding value based on pedigree and performance recorded information.

They are essentially a projection of how that animals progeny will perform for a range of traits.

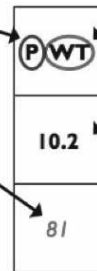

The diagram illustrates how to interpret an ASBV.

#### 1. AGE STAGE

The first letter is the age stage.  
 W = Weaning (6-16 weeks)  
 P = Post weaning (7-10 months)  
 Y = Yearling (10-13 months)  
 H = Hogget (13-18 months)  
 A = Adult (>18 months)

#### 4. ASBV ACCURACY (%)

This is a reflection of the amount of information available on each animal for each trait. As the amount of information increases the accuracy increases. The higher the accuracy, the closer the ASBV is to the true breeding value of the animal.

#### 2. TRAIT NAME

The trait is expressed as an abbreviation of the trait name. This example is weight (WT).

#### 3. ASBV

ASBVs are expressed as either positive or negative deviations from an average. This example for post weaning weight (PWT) is 10.2kg. As rams contribute half the genetics of their progeny (the ewe the other half), the resulting progeny will on average be 5.1kg heavier at post weaning than an animal with a PWT ASBV of 0.

## ABBREVIATIONS DEFINITION

<b>PWT (kg)</b> <b>Post Weaning Weight</b>	Rams with a more positive Post Weaning Weight will, on average, produce lambs that grow faster and are heavier at 7 – 10 months.
<b>YWT (kg)</b> <b>Yearling Weight</b>	Rams with a more positive Yearling Weight will, on average, produce lambs that grow faster and are heavier at 10 - 13 months.
<b>YFAT (mm)</b> <b>Yearling Fat</b>	Rams with a more positive Yearling Fat ASBV will, on average, produce progeny with a higher fat depth at a constant weight.
<b>YEMD (mm)</b> <b>Yearling Eye Muscle Depth</b>	Rams with a more positive Yearling Eye Muscle Depth ASBV will, on average, produce progeny with more muscling at a constant weight.
<b>YCFW (%)</b> <b>Yearling Clean Fleece Weight</b>	Rams with a more positive Yearling Clean Fleece Weight will, on average, produce progeny that cut more wool.
<b>YSL (mm)</b> <b>Yearling Staple Length</b>	Rams with a more positive Yearling Staple Length will, on average, have greater genetic potential for longer fibre length.

# Merino and Poll Merino Sire Overview

---

**958-14-RP11:** A sire that breeds consistently well. His progeny have exceptional structure and wool quality of fine/medium type. 958 always produces a lot of tops to very few culls and has a very good YCFW EBV of +24. Lincoln Foot Score: 3-4.

**1022-16-AF:** Is a ram that breeds good constitution. He has positive carcass traits while maintaining fleece weight and staple length. He breeds an even line of progeny that would suit any environment. He has a Lincoln Foot Score of 1-1

**106-15-A17:** Comes from a family of consistent performers. Good growth and fleece weight. Ideal for finishing hoggets. Lincoln Foot Score 1-3

**518-14-N2:** Is a son of Nerstane 080290 that performed really well in an Australian Sire Evaluation. He is one of three sons we used in the stud. Lincoln Foot Score 1-3

**539-16-BC1:** Structurally sound moderate framed ram that carries a spinners type wool. The 539's perform well for worm egg count and are one of our highest ranked sires for the new foot rot research breeding value. Lincoln Foot Score 1-4

**900-16-RA:** A son of 958 out of a Nerstane 080290 daughter. Progeny are heavy cutting with well nourished white wool. He has solid yearling weight and fleece weight data behind him. Lincoln Foot Score 3-4

**1827-15-PP:** A son of a Pemcaw ram that sold for \$50k in Australia. Progeny are all very good structurally with a safe white well crimped wool. Lincoln Foot Score 3-4

**1864-16-PMC:** Has been a standout since he was a lamb. A son of West Plains "Mercenary" who was Supreme Champion Merino in Sydney 2015 and also won the objective measurement class. 1864 breeds a very uncomplicated type with good staple length and wool quality. Foot score: 2-4

**1861-16-PMC:** The ram was the heaviest cutter in his drop and that's shown through in his progeny. He has a bold well-nourished wool. He is another son of Mercenary. Lincoln Foot Score 2-4.

**4-11-West Plains (Mercenary):** Used extensively in Australia and New Zealand the wools on the Mercenaries are exceptional. He is an industry leader for colour and character.

**474-14-Anderson:** We selected this Anderson ram for his superior carcass traits as well as worm egg count reduction. He has performed well in NZ and Australia and been used in the CPT here. Crossed with our wool types we have some really good young sires.

**102-16-Maryburn:** Purchased at Maryburn's 2018 ram sale he is an uncomplicated ram with good early growth and carcass traits. Lincoln Foot Score 1-3.

## Romney Sires - Halfbred Progeny

Romney sires are selected for growth wool quality and maternal traits. Rams come from studs that still place an emphasis on wool quality and freedom from black spots. Sires are used in Syndicates and are predominantly from Glenleith and Merrydowns.

## Merino Sires - Quaterbred Progeny

To breed our Quarterbreds in 2018 we used two syndicates of Poll Merino ram lambs. One a group of Grays Hills 506-10 (5001-16-QBG) sons and the other 1864-16-PMC (5005-17-QBM) sons. These are mated to our elite Halfbred ewes.

# Industry Leading Economic Farm Surplus Per Stock Unit

Generated through a true dual purpose animal with quality fine wool , growth and carcass as well as reproduction.

All progeny are measured for growth, eye muscle and fat, worm egg counts, wool traits including staple length, weight, micron, colour and character etc...

We also have collected foot rot data and have reportable research breeding values on our merino ram hoggets.

We breed for a balance of traits to produce a sheep that suits the harsh high country environment of the South Island.

A focus on Maternal traits has seen our Merinos consistently wean over 120% and Halfbreds over 160%.

We pride ourselves on our structural soundness, constitution and quality white waterproof wools.

All animals are performance recorded on Merinoselect and accredited Brucellosis Free.
