

# Hinewaka

Shorthorns

*Bull Sale*

**Wednesday 5th  
June, 2019  
3.00pm**

on farm,  
Te Wharau Road, Gladstone,  
Masterton

Hinewaka Shorthorns, 456 Te Wharau Rd, Masterton  
[www.hinewakashorthorns.co.nz](http://www.hinewakashorthorns.co.nz)

**WE'VE  
MADE**

# **BULLS MORE ATTRACTIVE.**

The handsome beasts in this catalogue will look even more appealing on sale day, thanks to FMG – the country's leading rural insurer. With 14 days free Exclusive Bull Cover, they'll be automatically insured from the fall of the hammer, covering their transit and infertility. And you can keep that cover going for the remaining 12 months for just 6.5% of the purchase price, for bulls up to the value of \$50,000. So don't miss this chance to buy bulls covered by FMG. It's a mighty attractive offer.

Please note this is only a summary of FMG products and services and is subject to our specific product documentation. For full details, refer to the relevant policy wordings at [fmg.co.nz](http://fmg.co.nz)

*We're here for the good of the country.*

# Hinewaka Shorthorns

## BULL SALE

**David and Pip Blackwood**  
*welcome you to Hinewaka for our*  
***Annual on Farm Bull Sale.***

*You are invited to join us for  
light refreshments after the sale.*

Shorthorns have been farmed on the Hinewaka and Glenside properties for over 140 years and five generations of the family. It wasn't until the late 1940's that the 'Glenside' stud was registered and it became one of the leading Shorthorn studs in the country, selling bulls all over New Zealand. Bulls were imported from England, Scotland, Australia and Canada to add to the bloodlines.

The 'Glenside' prefix was changed to 'Hinewaka' after the Glenside property was sold in 1974 and all the stud was then run on Hinewaka.

Beginning my farming career in 1983 I was very fortunate to take over such an established, quality herd of Shorthorn cows. We have endeavoured, over the years, to build the herd in to one of the best in the country.

With the use of first Beefplan and then Breedplan, we have been able to objectively select females that suit our environment and progress our breeding objectives rapidly. This progress can be measured against other breeders throughout Australia and New Zealand and we know we are on the right track. We can confidently offer for sale a selection of superior bulls that will enhance the profitability of your cow herd operation.

Hinewaka is a 720ha summer dry, hill country property of medium to steep contour, 1400 feet above sea level.

All heifers are mated as yearlings, each year using some of our top yearling bulls. Heifers not in calf as a yearling are culled. Any heifer helped at calving, and it's progeny is culled.

We are proud to offer the bulls in this catalogue for auction at Hinewaka. We are not selling at the National. Our top bulls are included in this catalogue.

# Conditions of Sale

## **Fertility Guarantee**

All bulls in this catalogue have been semen and service tested by Guy Haines Totally Vets and are guaranteed fertile and in working order at the time of the sale. A copy of the semen and service testing will be on display on sale day.

The purchase price of any bull proven to be infertile will be refunded by the vendor, provided the bull has been kept in fair and reasonable condition by the purchaser, and the purchaser has been notified within 6 months from the date of sale.

The bull will become the property of the vendor and will be disposed of at his discretion.

## **Feet Guarantee**

All bulls in this catalogue carry a feet and soundness guarantee until they are 3 years of age. Should they develop a fault which affects the bulls ability to breed, the bull is to be returned to the vendor who will refund to the purchaser a proportion of the purchase price.

The method of refund applying to the above guarantees will be that the vendor will make credit available to the purchaser via subsequent bull sales held by the vendor.

## **Insurance**

All bulls become the buyers responsibility from the fall of the hammer.

## **ENQUIRIES:**

**David Blackwood**

Phone: 06 372 7615

Email: [blackwood@wizbiz.net.nz](mailto:blackwood@wizbiz.net.nz)

**AUCTIONEERS: PGG WRIGHTSONS**

**BOOKING AGENTS: CARRFIELDS**

**Brian Diamond**

Phone: 06 377 3311

## **Delivery**

Free delivery in the North Island within 7 days

## **Auctioneers and Booking Agents**

PGG Wrightsons, Wairarapa & Carrfields

## **Commission**

6% will be paid to all companies introducing purchasers prior to the sale.

## **TB C10**

## **BVD**

All bulls have been tested negative for BVD and vaccinated.

## **PURCHASING REBATE**

All intending purchasers must register at the sales office prior to the sale.

PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

## **TERMS AND CONDITIONS**

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by PGG Wrightson Limited (PGW), PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at:

*[www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions](http://www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions) or in hardcopy on request.*

**Please bring this catalogue to the sale.**

# Explanatory Notes Sale Catalogues

## Estimated Breeding Values (EBVs)

An estimated Breeding Value EBV is an estimate of the genetic value of that particular animal for each trait measured.

### ACCURACY

An accuracy is presented with each EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the less the animal's EBV are likely to change as more information is analysed for that animal or its relatives. Accuracy below 75% should be considered to be low. EBVs are provided for the following traits

**Calving Ease EBVs (%)** are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

**CE % Direct** = Direct Calving Ease - The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age.

**CE % Daughters** = Daughters' Calving Ease - The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age.

**Gestation Length EBV** (days) is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

**Birth Weight EBV** (kg) is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

**200-Day Growth EBV** (kg) is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600-Day Weight EBV** (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**Mature Cow Weight EBV** (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

**Milk EBV** (kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

**Scrotal Size EBV** (cm) is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to

400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

**Days to Calving EBV** (days) indicates the fertility of the daughters of the sire. It is the time interval between the day when the female is first exposed to a bull in a paddock mating to the day when she subsequently calves. A negative EBV for days to calving indicates a shorter interval from bull-in date to calving and therefore higher fertility.

**Carcase Weight EBV** (kg) is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

**Eye Muscle Area EBV** (sq cm) is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass. More positive EBVs indicate better muscling on animals. Sires with relatively higher EMA EBVs are expected to produce better-muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower EMA EBVs.

**Rib Fat and Rump Fat EBVs** (mm) are calculated from measurements of subcutaneous fat depth at the 12/13-rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass. Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

**Retail Beef Yield EBV** (%) indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

**Intramuscular Fat EBV** (%) is an estimate of the genetic difference in the percentage of intramuscular fat at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

### COMPARING EBVs:

The EBVs for Beef Shorthorns can not be compared with EBVs for animals of another breed. They should be compared with the current average EBVs for Australasian Beef Shorthorn shown below.

## 2019 SHORTHORN BREEDPLAN AVERAGES FOR 2017 BORN CALVES

DIR	DTRS	GL	Birth	200 Wt	400 Wt	600 Wt	McW	Milk

+1.5	-1.7	+34	+4.3	-0.3	-0.3	+1.0	+0.5	

## The Self - Replacing Index

“The Self-replacing Index” ranks bulls on their ability to generate profit (profit per cow mated) in a herd situation in which some females are retained for breeding and surplus females, along with all males, are slaughtered.

The main drivers of profit addressed by the Index include (in order of economic importance):

- Direct and Maternal Calving Ease
- Growth
- Meat Yield
- Cow Survival
- Finishing Ability
- Fertility
- Cow Efficiency

In short, selection on the Index is expected to favour production of a cowherd with excellent reproductive efficiency, rearing progeny with moderate-to-high growth rates and high yielding carcasses.

- Comparing the lifetime profitability of two bulls:

The following example illustrates how potential differences in lifetime profitability can be approximated between bulls with different Indexes. These estimates of value differences may be conservative.

Two bulls with Self-replacing Indexes of \$40 and \$20 are mated to genetically similar cows. If each bull mates 200 cows during its lifetime, the first bull will generate \$2000 ( $$(40-20)/2 \times 200$ ) more profit during its lifetime than the second bull (the \$20 profit advantage must be divided by 2 because a bull only passes half his genes on to each of his progeny).

### The Dairy Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial dairy herd targeting the production of dairy beef progeny from dairy cows and heifers where all progeny are slaughtered. Steers are assumed marketed at 520 kg live weight (280 kg carcass weight and 6 mm fat depth) at 20 months of age. While calving ease is by far the most important profit driver in the Index, growth and to a lesser extent meat yield also contribute.

INDEX VALUES (\$)	
Self Replacing	+56
Dairy	+26

The Australasian Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the New Zealand Beef Shorthorn Association nor the ABRI oversee or audit the collection of this data.

# NOTES

## *Exclusive Bull Cover*

### ***What is Exclusive Bull cover?***

All bulls auctioned at this sale up to the value of \$50,000 will automatically be covered under FMG's Exclusive Bull cover for 14 days at no cost to the purchaser.

### ***Length of cover***

To extend cover for the specified bull beyond 14 days you need to tick Exclusive Bull cover 12 months on the Purchaser Instruction and Insurance Slip in this catalogue. The specified bull is then covered for the remaining period of 12 months. The premium is payable to FMG and is in addition to the purchase price of the bull.

If you require an alternative cover period talk to an FMG representative.

### ***Your bull's value***

Any bull covered under this policy must be purchased for \$50,000 or less. For any bull purchased over \$50,000 talk to an FMG representative.

### ***During the period of insurance, the specified animal is covered for:***

- Death or infertility as a result of accident, disease or illness.
- Transit.
- Theft.

### ***What we will pay***

Fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

### ***Disclaimer***

Please note this is only a summary of the product and is subject to our specific product documentation. For full details, you should refer to the policy document. You can get these documents, and any other information you need, from your FMG representative, by calling us or visiting our website.
